PROFESSIONAL EXPERIENCE

Middleware Engineer (Quantum S.R.L)

December/2020 – June/2023

- Provided suport to Tigo's teams both from TBB and Digital for production services, maintaining stability in Linux servers with Jboss Fuse for Java services.
- Provided Jboss and Linux support to telecommunication companies such as Tigo Bolivia.

Backend Developer (Quantum S.R.L)

January/2021 – December/2023

- I developed multiple microservices for Tigo Bolivia that were deployed in production on Kubernetes using both pure Java and Spring Boot. These microservices had a test coverage of 90% for unit tests.

Scrum Master (Quantum S.R.L)

October/2022 – August/2023

- Worked as Scrum Master in Frontend Development projects in Angular and Backend in Spring Boot.
- Also worked as team leader in the development of Backend/Frontend software (Java/JavaScript).

TD Bank (Freelancer Canada)

December/2021 – April/2022

- Developed a mapping service to convert bank account types (mapping) with multiple REST API endpoints for a project named PBACC API.
- Refactored existing code to improve the visibility of the development team's code

AT&T (Freelancer Canada)

May/2022 – May/2022

- Collaborated in the imgration of a project named SOEG-CMI from Java 8 to Java 11.
- Replaced an obsolete applet with JSP using HTML and normal POST from a servlet.
- Developed a new integration and replacement of cookies to use OIDC (Open ID Connect).

Enverus (Frelancer Canada)

April/2023 – July/2023

- I worked as a developer assigned to solve multiple tasks through the JIRA platform on the "Oracle upgrade 19c" project.
- I worked with FlyWay to update scripts and migrate the old database to the new version, along with their respective unit tests using Groovy and Spock.

Backend Developer (Banco Bisa S.A. banking institution)

December/2024 - Actual

- I developed REST microservices in Spring Boot, documenting each requirement in Confluence, always considering an 'API First' approach.
- I worked in the 'Electronic Banking' area, responsible for all types of credit transactions to clients of the bank named 'Product Schedule'.

PROJECT EXPERIENCE

Bolivian Road Administration (ABC)

January/2019 – June/2019

Call Center Operator

- Provided guidance to users who requested information on the transito f roads in Bolivia though the company's Call Center

Gerenssa

June/2019 – December/2019
